

Job Title: Mobile App/Web Developer

Employment Status: Full-Time

Function: We're looking for a Mobile App/Web Developer to help us design, create and grow our mobile applications and platforms. This person will work closely with our product team to assess the implementation strategy to fulfil customer and business needs. This analysis will support the implementation and deployment of new business functionality through our agile software development lifecycle. This position requires a highly motivated individual who is comfortable with rapid changes in direction and environment.

Essential Tasks and Duties:

- Develop applications and services for mobile platform and sites particularly, HTML5, Javascript & Native Mobile Apps.
- Guide the architecture and technology decisions to drive quality, performance, usability, and sustainability to empower a world-class user experience.
- Instrument your code to achieve insight on usage and performance.
- Follow engineering best practices and provide technical mentorship to other members of the team.

Knowledge and Skills:

- Computer Science fundamentals in object-oriented design, data structures, algorithm design and problem solving.
- Proven experience implementing mission critical internet based applications implementing best practices for software code development, re-use, and componentization.
- Experience in developing applications for mobile browsers and mobile-optimization. Native App development experience in Android, iOS, MySQL, PHP, Postgresql SQL, PhotoShop, Functional Javascript, HTML5, CCC3, APIs, HTML, UX, JQuery, AJAX, JSON
- Third-party API integration via Rest-ful web services
- Experience integrating with new and unfamiliar APIs; working with other customers/departments and interfacing with their technical infrastructure (servers, databases, APIs, etc.)
- Experience in Unix/Linux environments.
- Progressive Web App
- Passionate orientation and attention to customers.

Education:

- BS or equivalent degree in computer science or related field.

Experience:

- Bachelor's degree in Computer Science, Engineering or similar, and/or relevant experience
- Experience in Mobile Applications Development and Mobile Enterprise Application Platforms would be an asset

Show us your work:

Please use this space to list your:

- Mobile Applications which were developed and deployed publically by you
- Websites that you have designed and deployed
- A sample of your source code to show off your awesome skills would be appreciated
